

## About Duol

DUOL is leading company in fabric structures in the major world markets. Since its founding in 1992 DUOL has grown to the leadership position in the fields of engineering, producing, assembling and maintaining of fabric structures. More than 1000 covered sport facilities over the world have been designed, produced and installed under the DUOL trademark. Duol is specialized in the production of air supported structures and frame supported structures (steel structures, wooden structures, tension structures).

With custom-designed domes, meeting technical, economical, safety and aesthetic criteria, DUOL has prove to be an invaluable partner to any investment into sports facilities. DUOL is expert at finding the most suitable solution and giving its clients the best for their money. The success of turn-key projects is ensured by DUOL's in-house team of specialists, who are ready to consult and support its customers in every moment.

## MISSION AND VISION

Our mission is to offer broader crowd of people possibility to play all year sport in controlled environment inside our cost effective, quality and durable structures.

DUOL vision is to continue following the global trend of development in textile technologies, and to remain leader in innovations of fabric structures. Our superior technology solutions combined with our exceptional customer care ([WeCare](#)) will allow us to remain global leading company in fabric structures.
