

## Air Domes

The main advantages of DUOL air domes in comparison to traditional solutions are low prices and fast delivery terms. This is possible due the fact that air air supported structures do not require concrete, steel or wooden supporting construction. Air is only supporting system. Materials used in air supported structures are usually translucent, therefore the use of lighting system inside the structure is not required during the daytime.

With DUOL air-supported structures, a variety of sports and recreational activities can be played year-round, in any kind of weather. DUOL manufactures inflatable domes for variety of sport. Most demand is for football, hockey, swimming and tennis air domes, but DUOL can also produce turnkey solution for any other sport. For different sports (basketball, volleyball, softball and other sports) appropriate sports flooring along with other facilities from wardrobes to stands can be installed.

By choosing DUOL's sports domes you will get cost-effective solution designed exclusively to your needs. Lifespan of DUOL's inflatable structure is more than 40 years. During that time your initial investment will be paid of many times. More than 1000 covered sport facilities and 20 years of experience, assures you top quality and durability of DUOL products.
