

Services

The success of turnkey projects is ensured by DUOL's professional services and DUOL's in-house team of specialists. DUOL have the necessary infrastructure, experience, personnel, technology, equipment to handle any project, from a single tennis court cover, to the DUOL largest 15000m² big air supported structure. Engineers and architects work alongside with a team of experienced project managers and assembly personnel to generate value in sport engineering. The whole procedure is done in tight cooperation between the DUOL team and the investor. This is why the domes are custom designed for different purpose: to cover sport areas, industrial zones or cultural venues such as concert halls.

We are committed to creating a seamless and stress-free experience. Some of our services are:

- Seasonal Dome or Fabric Structure Installation and Takedown
- Yearly Maintenance
- Air Supported Dome Inflation System Maintenance and Service
- Inflation System Retrofitting
- Heating and/or Cooling System Maintenance
- Fabric Retrofitting
- Extended Service Agreements for Fabric Buildings, Air Structures, Domes
- Emergency Maintenance
- Air Structure and Air Dome Relocation & Moving
