

ALL WEATHER COMFORT

Duol [heating units](#) safely and efficiently heat the air structure to the desired temperature. Humidity inside the structure is controlled by DUOL's innovative heating-ventilation system.

DUOL [Duol DMS Plus](#) and [SpaceDome™](#) guarantee resistance to harsh climatic conditions and ensures the highest temperature isolation.

[Air Conditioning](#) is available as well, and will be custom designed for each project's specific requirements.

DUOL air domes are located around the world in a variety of climates. DUOL air supported structures are designed and engineered to withstand most of unusual weather conditions and natural disasters.
